

The AVA logo is displayed in white, stylized, sans-serif font on a purple rounded square background in the top left corner of the image.

AVA

A full-page photograph of an industrial facility. A worker in an orange jumpsuit, white hard hat, and safety glasses stands on the right, holding a clipboard and pen. The background is filled with complex industrial machinery, including pipes, valves, and electrical conduits, all supported by a yellow metal structure. The floor has yellow and black safety stripes.

Industry solutions

**Keeping services up  
and running for critical  
infrastructure**

Faced with threats to OT systems that often originate from IT networks, security teams need visibility of IT traffic and anomalies. Choose Reveal to improve supervisory control and data acquisition (SCADA) security as the first and most critical step to gain visibility.

## Why Ava?

### Human-centric security

Individual user profiles shed light on how data is accessed and used, with optional anonymization for privacy. With user activity monitoring, you can protect your systems and data from those who already have privileged access and knowledge of sensitive data and systems.

### Full visibility to current blind spots

Continuous monitoring provides visibility into user behaviour, data access, and system use. Security operators can search on file, USB device, connection, browser, application events, and more.

### Prevent accidental security breaches

With incident-based training, you can train your employees to make the right decisions on detection of unacceptable behavior, reinforce corporate security policies and promote good cyber hygiene. Achieve a lasting impactful effect with adaptive IT security policy enforcement.

### Experienced analysts dedicated to you

Identify and manage risk and vulnerabilities with the help of Ava Cyber Analysts. Experienced cybersecurity specialists with a strong background in security monitoring, CIRT, and incident response; our analysts can create risk assessment reports customized to your organization.

## Key benefits, delivered

### Understand the risk to systems and data

- Attribute all collected data and user activity to specific users
- Assess how different types of user activity adds to risk
- Understand when to implement additional security measures

### Strengthen the security posture

- Change employees' behavior via incident-based training
- Prevent malicious activities from happening by alerting on suspicious behavior
- Block activities such as uploading confidential files to personal drives

### Full visibility while maintaining privacy

- Detect and mitigate threats while maintaining the confidentiality of users with anonymization
- Attribute data and events to individual users
- Identify how data is accessed and used

### Simple and secure

- Easy to deploy the lightweight Reveal Agent
- Simple to use with an intuitive user experience
- Robust security controls and anti-tamper measures across the solution and the Reveal Agent

## Your human-centric security solution awaits

Ava  
Reveal

Ava Reveal helps you understand human and device behavioral patterns in real time. Strengthen your defense against insider risks—malicious, careless, and accidental. Make your static IT policy come alive, close compliance gaps, and protect against data loss.

Ava Analyst  
Services

Identify and manage risk and vulnerabilities with the help of Ava Cyber Analysts. Our experienced cybersecurity specialists have a strong background in security monitoring, CIRT, and incident response, and provide risk assessment reports tailored to each organization.

### Simple and flexible licensing

Ava uses a cost-effective, straightforward subscription model including services and software upgrades without hidden cost.

Ava exists because we believe that we can create a better, smarter way to deliver security. We inject intelligence into our approach to security and all our solutions. We help organizations get the whole picture of their surroundings to protect their people, business, and reputation in real-time.
